

Legal Eagles

When you need legal help, who do you call? A new national survey reveals IE attorneys who are tops in their fields.

The law is a complex beast with more twists and turns than an off-road course. Just when you think you know the rules, somebody changes them. Besides having to be aware of the numerous things you can and can't do while driving, you also have to consider municipal codes, tax codes, and business laws to name just a few. As an average citizen, how do you keep up? You don't, but your lawyer does. If you don't have one, check out our list of top rated attorneys in the Inland Empire that comes from the legal industry's go-to guys, Martindale-Hubbell. The firm conducts peer review surveys of attorneys and assigns an AV rating to those who are "preeminent and highly recommended" in their fields. From cradle (paternity) to grave (wills), you'll find one that suits your needs. We also profile a few who do their best to solve your problems.
